AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

- 1-14. (canceled).
- 15. (currently amended): A method of enabling a site server and a customer to share at least one of a contents encryption and a contents decryption key, the method comprising:

the site server receiving personal information of the customer, <u>wherein said received</u>
personal information is sent by the customer:

generating a unique encryption key corresponding to the received personal information of the customer; and

transmitting the generated encryption key to the customer.

- 16. (previously presented): The method of claim 15, wherein the personal information of the customer is generated based on a resident registration number of the customer.
 - 17. (previously presented): The method of claim 15, further comprising: storing the personal information of the customer and the encryption key; and generating a customer database using the stored personal information and encryption key.
- 18. (previously presented): A method of enabling a site server and a customer to share at least one of a contents encryption and a contents decryption key, the method comprising:

ast one of a contents encryption and a contents decryption key, the method comprising

the customer transmitting personal information of the customer; and

receiving a unique specific encryption key corresponding to the personal information of the customer.

AMENDMENT UNDER 37 C.F.R. § 1.111 U. S. Application No. 09/770,225

- 19. (previously presented): The method of claim 18, wherein the personal information of the customer is generated based on a resident registration number of the customer.
- 20. (previously presented): The method of claim 18, further comprising storing the personal information of the customer and the encryption key.

21. (currently amended): A contents encryption method comprising:

receiving personal information of a customer, wherein said received personal information is sent by the customer:

generating a unique encryption key corresponding to the personal information of the customer; and

encrypting contents using the encryption key.

22. (currently amended): A content decryption method comprising:

transmitting personal information of a customer, by the customer;

receiving a unique encryption key corresponding to the personal information of the customer; and

decrypting encrypted contents using the encryption key.

- (new): The method of claim 15, wherein the personal information comprises a
- (new) The method of claim 15, wherein said received personal information is initially sent by the customer.
- 25. (new) The method of claim 21, wherein said received personal information is initially sent by the customer.
